billwerk integrates Adyen and underlines its claim of leadership in Europe

With the integration of the global payment provider Adyen, billwerk underlines its claim to be the leading subscription management platform in D/A/CH and the EU. By connecting Adyen, billwerk customers now have even more options for international payment processing.

Frankfurt am Main, the 12. March 2019 - With the integration of Adyen in the latest release, billwerk provides its customers with another relevant international payment provider for recurring payments. Adyen is a global payment provider that enables merchants to process recurring payments in e-commerce, mobile commerce and at the point of sale.

The Dutch payment provider supports companies worldwide in accepting payments from almost all sales channels. Adyen offers solutions for electronic payments with modern mobile/one-touch payment methods. You can use the global provider both for credit card payments and for the EU-wide SEPA Direct Debit Scheme.

"With the Adyen integration, we are underscoring our claim to be the leading subscription management platform in the EU," says billwerk CEO Dr. Ricco Deutscher, explaining this measure. "More and more European corporates rely on our platform for their subscription business. As a result, the requirements to increasingly integrate international payment providers and payment methods are also increasing," continues Deutscher. "There is currently no other

subscription management platform operator worldwide that has integrated more German and European payment providers in a standardized way. In addition to GoBD certification, this gives us another unique selling proposition over our US competitors," emphasizes billwerk CMO Pierre Schramm.

With the Adyen integration, billwerk customers along with BS Payone, Wirecard, GoCardless, SlimPay, Heidelpay, Paypal and Stripe now have a total of 8 standard interfaces to German, European and global payment providers at their disposal.

The Adyen integration is now available for billwerk customers on the billwerk sandbox. The release in the production system is available for the 19. March 2019.

About billwerk GmbH

billwerk is an all-in-one subscription management software and recurring billing solution for European subscription business companies. The open platform automates all processes on every aspect of contract management, invoicing and payment processing in compliance with European standards to EU GDPR, GoBD, PCI DSS and ZUGFeRD and is integrated in the ecosystem of leading third-party suppliers. billwerk pursues a REST API-first approach and provides a variety of ready-to-use Integrations on the most important payment providers and other Saas applications.

billwerk was founded by physicist Dr Ricco Deutscher and co-founders Steffen Mey, Thomas Tauber and Christian Winnerlein in October 2015. The company maintains offices in Frankfurt am Main and Minsk and currently employs 35 staff.

About Adyen

Adyen is a global payment provider that enables merchants to process recurring payments in e-commerce, mobile commerce and at the point of sale. Adyen has more than 3,500 customers, including Spotify, Hello Fresh, Delivery Hero and FLIXBUS. The payment provider with its headquarters in Amsterdam / Netherlands employs over 600 people, is listed on the Euronext stock exchange and in 2017 processed more than 108 billion euros in payments.
